REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The examiner has found claims 1-15 to be unobvious over the prior art of record and therefore to be allowable over the prior art of record. The present invention relates to antibiotic coated porous bodies, comprising a coating made of at least one antibiotic salt that is hardly soluble in water or in an aqueous environment from the group consisting of specific antibiotics, said coating being introduced into a porous system of non-metallic porous bodies and/or of metallic porous bodies. The relevant prior art documents (US 4,713,076 and US 4,749,585) to this invention disclose respectively, that antibiotics can be added to the coating of porous spherical particles, and prosthesis coated with an ionic surfactant, an antibiotic and/or antithrombotic agent. However, the prior art documents in combination do not disclose nor suggest the porous bodies comprising the claimed antibiotic salts of the instant invention or a method of preparing the same, much less the porous bodies consisting essentially of said coating which implies the exclusion of any other possible elements which would materially change the invention. On the contrary, the prior art documents teaches that it is important that the pores of porous coatings (of calcium phosphate or similar materials) be filled with a considerable amount of binding agents. Furthermore, neither of the prior art documents suggests said porous bodies that are coated on the inner surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
